# MINUTEMEN SERVE WITH PRIDE

Naval Mobile Construction Battalion SIXTY-TWO is a proud unit with a noble heritage. Originally organized with construction workers from the Midwest on Dec. 7, 1942, and commissioned at Davisville, R.I., on Dec. 30, 1942, the "Mighty Minutemen" first won fame at Pearl Harbor where they built many of the facilities at the submarine base. Some of them remain today. Later, after landing at Iwo Jima, they repaired and maintained captured enemy airstrips. The battalion eventually moved to Japan where it was decommissioned on Sept. 15, 1945.

Since recommissioning at Gulfport, Miss., on July 2, 1966, the battalion had deployed to Vietnam four times to provide construction support for American forces in combat areas and to stand by to fight if necessary. They had also deployed to Puerto Rico, the British Indian Ocean Territory island of Diego Garcia, the island of Guam; Rota, Spain; and Camp Shields, Okinawa.

"The Minutemen Battalion" has earned three Meritorious Unit Commendations and two Navy Unit Commendations in its 22 years of active service.

This command is also a four-time recipient of the Peltier Award, given annually by the Society of American Military Engineers to the construction battalion it feels is the best example of excellent construction and military preparedness.

NMCB-62 is the only battalion to receive the award four times.

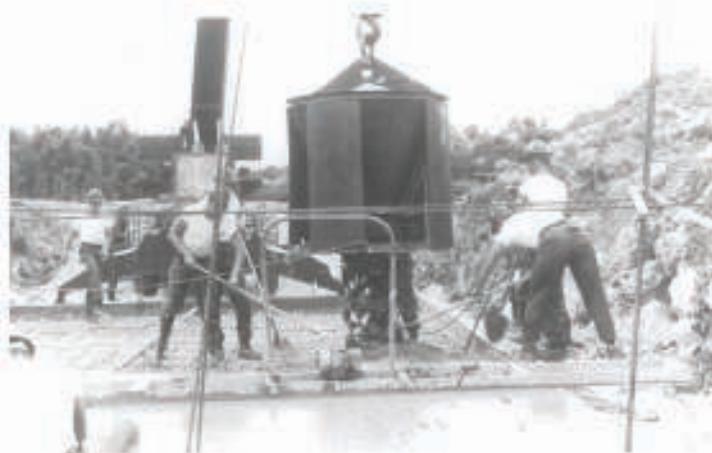

During the Vietnam War, NMCB-62 won the Peltier Award twice in 1969 and 1970. The third one was received in April 1978, recognizing the battalion's outstanding construction achievements on the island base of Diego Garcia, located in the British Indian Ocean Territory (Chagos Archipelagos group). The fourth award was presented to the battalion for its outstanding work in Rota, Spain.

NMCB-62 was the last full battalion to serve in the construction effort on Diego Garcia, ending an 11-year history of Seabees on the island in July 1982. The battalion also had the last detachment of Seabees on site at Diego Garcia, ending with the battalion's deployment to Guam in September 1983.

During the "85"-86" deployment to the Pacific, the Minutemen worked from the mainbody site in Okinawa, Japan and four Detachment sites: Adak, Alaska; Iwakuni, Japan; Sasebo, Japan; and CAT 6213 deployed to the island of Yap. The dedicated work by Sixty-Two resulted in some 33,942 mandays of quality construction and sharpening the men's military readiness through one of the best "Air Detachment" exercises.

# Commanding Officer

Commander E. W. Hamm, CEC, USN, has led NMCB-62 to the completion of the Puerto Rico Deployment, a Homeport training evolution and this deployment to the Pacific, since assuming command of the battalion in July 1984.

Setting new goals for the battalion, CDR Hamm has ensured the highest quality of construction, the utmost in Military Readiness and personnel performance for each Minuteman.

Prior to assuming command of Sixty-Two, CDR Hamm served as a Line Officer on board the USS Witek and USS Glennon. After conversion to a CEC Officer he has served with PWC, Pensacola, APWO, NAVSUPACT, Naples, Operations Officer for NMCB-133, Director Military Readiness Division, CECOS, Port Hueneme, CEC Detailer and OICC/ROICC, Sewells Point area, Norfolk, Va.

# Executive Officer

LCDR Edward L. Kornegay, CEC, USN, NMCB-62 Executive Officer, serves as the right hand man to the Commanding Officer. Whether at battalion quarters or a staff meeting, the Executive Officer acts as an administrative assistant to handle details, both large and small, concerning the ongoing business of the battalion.

From approving enlisted evaluations to presiding at XO's Screening, the Executive Officer maintains constant contact with Company Commanders, Department Heads and Special Assistants to coordinate the work of the command on a daily basis to ensure a smooth running operation.

# Command Master Chief

CUCM Billy R. Williamson, NMCB-62 Command Master Chief, serves as the principal advisor to the Commanding Officer for enlisted matters. In this capacity, CUCM Williamson meets with both the Chief Petty Officer and Officer communities within the battalion to discuss enlisted affairs, resolve problems and overall strengthen the Chain-of-Command as well as retention at all levels of the command.

# Battalion Chaplain

LCDR James H. Hightower, Battalion Chaplain, conducted services, provided help in emergency situations back home and offered spiritual guidance for all hands.

Putting on spiritual retreats and services went on, on a regular basis while being deployed to the Pacific. As much as the opportunity would allow, Chaplain Hightower would visit the Det sites to ensure their needs were being provided for.

During the Holiday season the chaplain made sure the meaning of the holidays weren't forgotten in the daily routine.

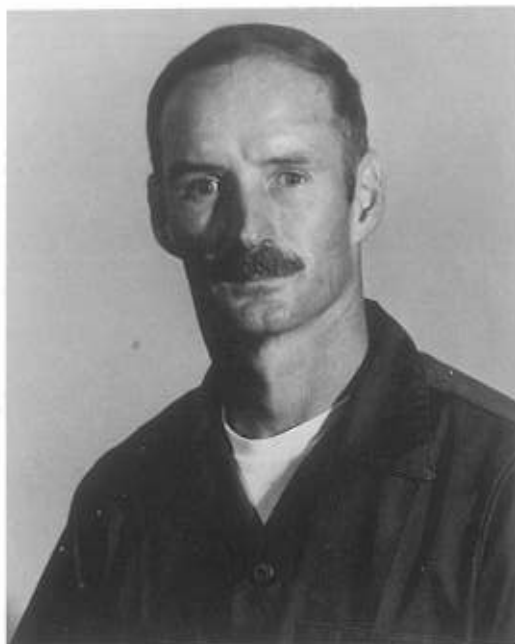

## Command Career Counselor

CMC Robert J. Riley, Command Career Counselor, provided each Minuteman with information on the opportunities available to him. The job of the counselor is to provide the Navy with the best possible people and give each person the needed information to make the decision about his Navy Career.

## DAPA

As the DAPA, BUC Johnny Gill assisted personnel in gaining information on drugs and alcohol. When a problem would arise in these areas Chief Gill would arrange for classes or any other assistance to help a person through a troubled time.

## Military Advisor

Military Advisor, reports to the Commanding Officer on matters of Military readiness and training. Filling this position is the battalion's only Marine, Gunnery Sergeant Robert Hancock.

## NMCB-62's Officers

The Officers man the barbecue, for the Over-The-Hump party.

Be it work or play the Officers of 62 display the highest Can Do spirit.

Ens. Parillo displays the 62nd pint of blood given during the blood drive.

# ALFA COMPANY

## Alfa Company

LT. E. W. Desaulniers  
Alfa Company Commander

The title of Alfa Company Commander was held by two Officers during the deployment: Lt. Eugene Desaulniers and CWO4 Lloyd Dyer. Lt. Desaulniers was the "A-6" through the homeport and majority of the deployment. In November CWO4 Dyer took the helm, after moving over from the "S-2" position.

The Company Chief, EQCM L. J. Cole, handled the major part of the company's administrative workload and oversaw the company chiefs.

Coordination of the Battalion's transportation needs was handled by EOC William Hickman, the ALFA Company Transportation Supervisor. The yard crew led by EO1 John Farrell, the Assistant Transportation Supervisor and Yard Boss, kept the motto "You call — we haul" alive with the help EO2 Edward Doyle, the Alfa Company Dispatcher and EO2 Michael Nelson, Yard crewleader. Picking it up and putting it down was the responsibility of EO1 Kevin Johnson, Crane Crew Supervisor.

The project side of the house was split between EOC Karl Brunner and EOC Richard Saffle, under the leadership of EOCS Thomas Bentley, Alfa Company Operations Chief. EO1 Donald Rath, Project Supervisor for the Futenma Access Road project, oversaw the construction of a 930 meter long paved roadway and excavation for a system of three 60 inch diameter concrete culverts. The Asphalt Crew, led by EO1 Hollis Robinson, completed roadwork and parking facilities at Camp Lester, Torii Station and the Kadena Magazine area. Alfa Company's first project completed on the deployment was the upgrade of two miles of range road at Camp Hansen. The project leader EO2 Samuel Marotta, oversaw the excavation work which provided two-way access for tank traffic.

Keeping 142 pieces of stored equipment in a ready status fell upon CMC Dominador Guerrero and his Kinser Warehouse Crew led by CM1 Malcolm Johnson.

Whether your "dump truck broke" or just needed an oil change CMC Douglas Joyner, Alfa Company Maintenance Supervisor, had someone to help you. CMC Ronald Abernathy, Shop Supervisor, took over from CMC Robert Riley, when he moved over to be the Career Counselor. Floor Supervisor CM1 Samuel Abenojar ran the 19 men crew that took care of the equipment breakdowns and ran a 40 day Preventative Maintenance Program on 170 pieces of active equipment and vehicles. Manufacturing hard to find parts and pieces was the job of HT1 Kenneth Ward and MR1 Dan Johnson.

Providing everyone with the needed tools was HT1 Jack O'Rourke, Tool Room Supervisor.

CM2 Matheus researches information in the tech library.

**BRAVO COMPANY**

Forty-Eight Alpha will live on with the Bravo crew that worked on the electrical distribution project at Futenma Marine Corps Air Station.

Not a person but an old wooden power pole that served its purpose well.

Project Supervisor, CE1 Robert Patnaude, had his crew on the job site before 0600 and worked through the day and long into the night. That seemed to be the pace of Bravo Company, long hours and dedication.

The Futenma project was one of the two major projects for Bravo Company. The other was the renovation of the electrical distribution system at White Beach.

The White Beach Project consisted of replacing a wooden pole, overhead primary electrical distribution system with a new concrete pole system. The new system was installed parallel to the existing system and energized by section to minimize interruptions. The project included the running of 5175 feet of primary overhead and 2280 feet of primary underground conductors and 14,800 feet of secondary overhead and 16,800 feet of secondary underground conductors.

# CHARLIE COMPANY

# CHARLIE COMPANY

Having their hands full, Charlie Company was busy with more than seven major projects while being deployed to Camp Shields.

Working on projects from the building of the new admin. facility at Camp Foster, to the tear gas chamber at Camp Hansen, Charlie Company left their mark on Okinawa.

Leaving Okinawa with more than 20,000 square feet of new floor space of buildings, is a lasting tribute of the quality construction by these devoted Minutemen.

## ADMINISTRATION AND PERSONNEL

CWO3 Stephen Darmstadt  
Administration Officer

The S-1 Department included Administration, Personnel, Legal, Postal services, Chapel, Medical and Dental. Over the course of the deployment 167 transfers and 105 receipts were processed and 123 awards were presented. The Special Staff provided sound and effective support to members of the Battalion in the areas of medical and dental care, religious programs, career counseling, and drug and alcohol programs.

# S-2 TRAINING

CWO4 Lloyd Dyer  
Training Officer

The "S-2" Training Department, has again ensured that all Battalion personnel were properly trained to perform their military duties and duties of their rating. CWO4 Lloyd Dyer was in command throughout homeport and was relieved by Lt. Eugene Desaulniers in November CMC Abernathy was relieved by EOC Bowin who "Took Charge" as the "S-2C," and GYSGT Hancock advised the Battalion on its military matters.

Gunnersmates Allen, Rabinowitz, and Evans manned the Armory and ensured that if a need arose, the armorment would be ready for use.

The Communications Shop, manned by ETs Chapman and Oswald, kept the Battalion in touch with each other during Air Det and the FEX.

The MAA Force, led by BMC Neill kept a watchful eye on the camp while the Battalion personnel were at work or rest.

The MARS station, run by BU1 Weinzirl and EOCN Saffert worked 16 hour days keeping the Battalion in touch with their families back in the states.

# S-3 OPERATIONS

LCDR Steven Johnson  
Operations Officer

A Naval Construction Battalion is a vast collection of individuals trained in all aspects of construction, personnel and logistics fields.

These diverse fields are then molded into one cohesive unit for the accomplishment of construction and contingency tasking.

It is by no means a small task to orchestrate this collection into one harmonious group. The conductor of this construction symphony is the Operations Officer. It is the job of the Operations Officer to fine tune all the efforts of this theatrical production called a deployment.

# DETAIL SITES

# DETAIL SASEBO

BU2 Calvin Bonner directed the crew at the 60 year old gym, in the replacement of damaged wooden structural members, wooden siding with metal siding and the existing men's and women's locker rooms with larger ones. When the project is completed tentative plans are to use the building as a Base Fitness Center.

At Hario-Shima, Ordnance Storage Magazines, BU2 Stephen Lemming directed the crew in constructing the fourth 4,000 square foot Pre-Engineered Building (PEB) that will be used to store ordnance. Each PEB constructed has required placing a 130 cubic yard concrete pad and installing a secondary electrical grounding system. In addition, the steel buildings are modified for skylights, louvers and steel doors.

The Camel Construction crew under the leadership of SW2 John Attaway, turned over the 20 foot by 30 foot floating separator to Public Works. The separator was constructed of 2-1/2 foot diameter steel pipe, which required all welds to be pressure tested to ensure water tightness. T-type moorings were fabricated and welded on the separator corners. After the pipe was assembled, wooden fenders, a zinc anode protection system and wooden deck boards were installed. The floating separator will be used to separate two ships that are berthed side by side.

# TOKOYAMA ORPHANAGE

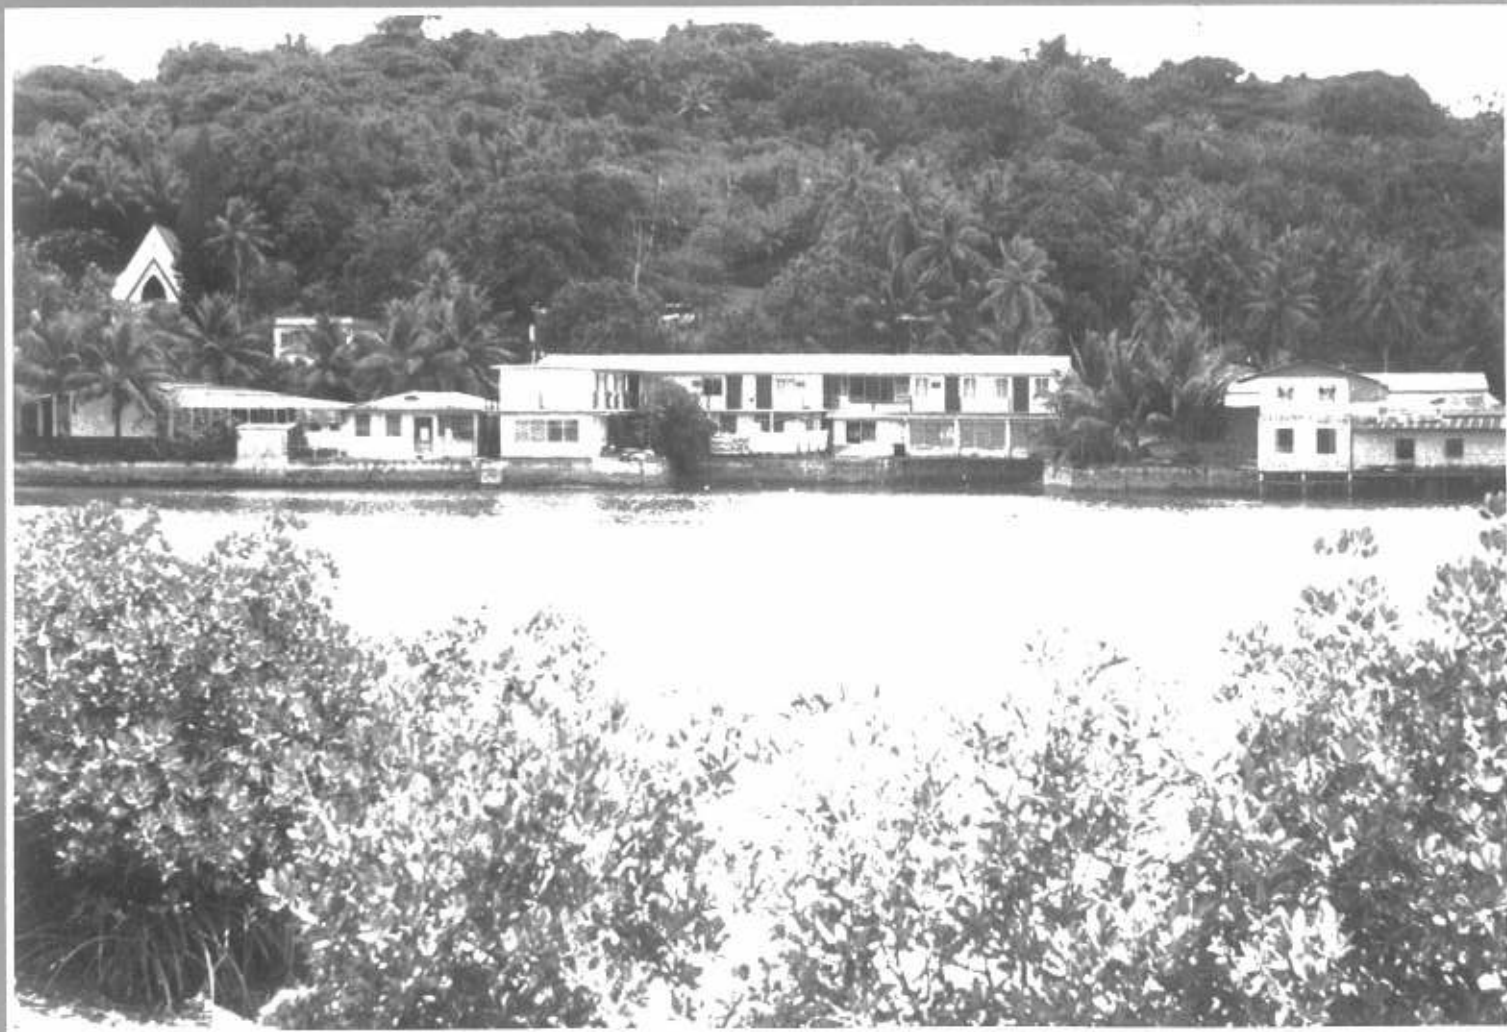

BU2 Briney, BU2 Sheffield and EO3 Boswell on orphanage trip.

# Civic Action Team Yap 6213

After arriving and taking over Camp Garfield in June, the detail got busy with their tasking. During this unique deployment to Yap, CAT 6213 fulfilled its mission of providing social-economic development and projecting a favorable military image by the undertaking of small scale construction projects and conducting a formal training program for the local workers and providing medical assistance to the local population.

Having adapted extremely well to their new environment, CAT 6213 is working their way towards the completion of a very successful deployment. Completed projects include a basketball court extension in the village of Rumuuq, a 12 foot by 12 foot by 8 foot reinforced concrete water catchment tank and complete electrical renovation of the village of Maedriich, the partitioning and electrical wiring of a community center in the village of Faraq, construction of an access road, a two inch concrete cap on the floor and wall plastering of a men's house in the village of Taeb.

In the area of training, CAT 6213 has graduated six trainees from an intensive nine month program concentrating on construction safety, construction techniques and the maintenance of construction equipment. Currently ten trainees are enrolled in the program and are scheduled to graduate after CAT 6213 returns to homeport.

The Team's Hospital Corpsman has had his hands busy since arriving. He has seen over 3,100 patients to date. Additionally, he has participated in one MEDEVAC from the outer island of Ulithi and has certified 26 members of the hospital staff in CPR.

If there had ever been any doubt about small groups being able to make a difference, the members of CAT 6213 have been able to put that notion to rest.

The members of CAT 6213 are: Lt. Michael Peek, (OIC), CECS Bruce Beckman, (AOIC), HMC Gil Fontecha, SWC Lester Broome, EO1 Lawrence Maddox, BU1 William Nixon, CM2 Damon Vaudrin, CM1 David Noel, EO1 Daniel Adkins, BU2 Rodney King, CE2 George Gojmerac, EA3 Bruce Jamison and UT3 Robert Combs.

# Det ADAK

Beginning an eight month deployment to the tiny Aleutian Island in the Bering Strait, became home while the Detail started work on its assigned tasks.

Battling 45 degree temperatures, continuous winds over 20 knots, rain, fog and mist, the Detail was off to a flying start by enthusiastically attacking six projects and performing various camp maintenance projects.

The Mighty Minutemen of Detail Adak, under the helm of Lt. Fred K. Gerheiser as Officer in Charge, CMCS Max W. Isaacson, as Assistant Officer in Charge, and EOC Gerald P. Napert as the Operations Chief Petty Officer, the Detail will tackle thirteen construction projects and various discretionary projects. Key members of the Detail include: EO1 Robert T. Hope, Crusher/Quarry Supervisor, BU1 Gary L. Oppenlander, Project Supervisor, EO1 Dennis Ross, Transportation Supervisor, and EO1 Roger Salois, Project Supervisor.

In support of the construction tasking assigned to Detail Adak are two groups; equipment maintenance, under the guidance and management of CM1 Keith Rinker, and supply, under the tight control of SK1 Fred C. Smith, geared up to serve and support the entire detail.
